

Ibbenbueren, Germany, August 28, 2006 – Wrocklage Intermedia GmbH, an International leading developer of PDF, security and digital signature software, announced today the release of its freeware Secure PDF Viewer. With common PDF Reader it is not possible to stop user saving/capturing displayed PDF documents to local disk. With the Aloaha Secure PDF Viewer it is now possible to display a PDF on a customer's machine without giving the customer the chance to save the PDF locally.

The Aloaha Secure PDF Viewer loads PDF documents from a memory address or an http location without caching the PDF somewhere on disk. This new technology for example allows eBook publishers to show their customers a preview of the document to be purchased without running the risk that the potential customer prints the document or recovers it somehow from a temporarily location.

Based on the Aloaha PDF Viewer ActiveX component the Aloaha PDF Secure PDF Viewer is included as source code in Aloaha's PDF Form Saver and PDF Signator packages. Like this the customer himself can modify the Secure Viewer to fit exactly his requirements. In case the source code samples in <Aloaha>\samples are not enough please do not hesitate to contact our support department.

Aloaha is the first Software supporting new German Health Professional Cards (HBA)

The new Versions of the Aloaha PDF Suite, Aloaha PDF Saver and Aloaha PDF Signator are the first and only solutions supporting the new German Health Professional Card. Aloaha supports this card native so that no CSP or PKCS modules are required. Doctors or Pharmacists just install Aloaha and are right away able to sign all their correspondence with their qualified certificate on the HBA.

Aloaha Custom Signer Plug-in

The Aloaha PDF Tools support per default software certificates, Smartcards via CSP and a broad range of native supported cards. For example the HBA mentioned above. Additionally Aloaha has also just introduced a plug-in Interface which can be used to connect the Aloaha tools directly with existing and proprietary PKIs. A generic code sample for the Aloaha Custom Signer plug-in is available at our support department.

Aloaha Time Stamping Authority (TSA)

After integrating the Aloaha Time Stamping Client in all Aloaha PDF Tools Aloaha received a lot of feedback from customers in different countries. The main reasons for our customers not using time stamping services are the high prices per time stamp (between 20 and 50 cents) in their countries or the non RFC compliance of the services available. Furthermore since NON RFC compliant time stamps are not being displayed by the Adobe Reader such tokens are useless.

Following its customers' feedback Aloaha decided to set up a Time Stamping Authority which generates fully RFC 3161 compliant tokens and which does not charge the customer per time stamp. Pricing of the Aloaha Time Stamping Authority is based on guaranteed availability (99%, 99.60%, ...), approx. time stamps required/month, audit intervals and other factors. Based on the customer requirements we offer the customer a flat rate so that there is no pricing/time stamp involved.

Aloaha PDF Suite

A new version of the awarded Aloaha PDF Suite is available for download. It includes new features such as the RFC3161 compatible time stamping client. The Aloaha PDF Suite Desktop Edition is now available in two different versions. Pricing for the Light Version without digital signatures capabilities starts at 29 Euro + VAT. Pricing for the Professional Version incl. digital signature capabilities starts at 79 Euro + VAT. The Server Edition is available for 490 Euro + VAT and the Enterprise Edition for 950 Euro + VAT.

A fully functional evaluation version can be downloaded from

http://www.aloaha.com/download/aloaha_pdf.zip.

Please note that the Server and Enterprise Edition require an evaluation key!

Aloaha PDF Saver

The new Version of the Aloaha PDF Saver includes now the source code for the Secure PDF Viewer. Furthermore it supports now the German Health Professional Card and has an inbuilt time stamping client.

Pricing for the Aloaha PDF Saver starts at 39 Euro + VAT. A fully functional evaluation version can be downloaded from

http://www.aloaha.com/download/aloaha_saver.zip

Aloaha PDF Signator

Additional to the CSP supported Cards the new version of the popular Aloaha PDF Signator is now supporting more Signature Cards native. For example it supports as the first and only solution the new German Health Professional Card (HBA). As the other Aloaha PDF Solutions the new Aloaha PDF Signator is now able to time stamp any signature created RFC3161 compliant.

Pricing for the Aloaha PDF Signator starts at 49 Euro + VAT. A fully functional evaluation version can be downloaded from

http://www.aloaha.com/download/aloaha_signator.zip

Aloaha PDF Crypter

The Aloaha PDF Crypter is the ideal tool to encrypt existing PDF documents with the public key of the recipient. Such certificate encrypted PDF Documents can only be opened by the legit owner of the private key. This makes Aloaha PDF Crypter a commodity for eBook publishers.

Pricing for the Aloaha PDF Signator starts at 49 Euro + VAT. A fully functional evaluation version can be downloaded from

http://www.aloaha.com/download/aloaha_crypter.zip

Kind Regards
Stefan Engelbert
