# Introduction

Who has not come across the situation: You complete a PDF form in the free Acrobat Reader and when it comes to saving your data, nothing happens. Or worse: You close the program and all your data is lost.

**The reason for this is:**

**Acrobat Reader cannot save any form field data!**

**As the name suggests – it is a reader only and not a saver!**

Aloha PDF Saver eliminates this problem in a very easy way! Once this software solution has been installed, all filled out PDF forms can be saved locally directly to PDF. No need to mention that all forms that have been filled once can be read again with the included data and also altered at a later date or sent via email.

## Top Features

- Save your form data to disk and open the form again without losing your entries.
- Save the data as editable form fields.
- “Burn/flatten” the data into the PDF so that no one can edit it again.
- Use the Aloaha PDF Form Saver as alternative PDF Reader.
- Open image files as PDF and add your own PDF Form Fields.
- Annotate PDF Document.
- Edit existing PDF Form Fields (Position, Properties, Fonts)
- Add Images to your PDF.
- Print “protected” Documents which cannot be printed with other Software.
- Embed Aloaha in your own applications.  
Aloaha Saver OCX included!
- Freeware Aloaha PDF Reader OCX included.
- No Adobe Software required.

## System Requirements

- Windows NT, Windows XP, Windows 2000/3 or Windows Vista
- No other Form filling Software, Form Server or Reader extensions required!
- No additional 3rd party packages such as Ghostscript required!
- Adobe Reader is not required!

## Usage Options

- Application deployed to all desktop PCs.
- Application OCX integrated in own Applications.
- Web Application based on Form Saver SDK

## External User – current Situation

**Currently it is useless to offer customers PDF Forms via a Company's Website.**

- Customers will print the document, fill it and post it via snail mail.
- This results in time delays and extra costs for the company since the data has to be entered to the system manually.

## External User – Solution

- Aloaha License embedded into PDF Form.
- Such **Aloaha enabled Forms can be used in the Freeware Edition** of the PDF Saver.
- Customers fill, save and send the forms with the freeware PDF Saver.
- Company uses the Aloaha SDK to transfer Data from PDF Form to Database.

## Showcases

Aloaha is very popular in areas where regulary nearly identically forms have to be submitted. One example is the monthly submission of TAX forms. With Aloaha you just re-open the form of the month before, change the amounts and submit it.

Online Banking is extremly costly. It has to be monitored 24x7 for possible security breaches, patch deployments and more. Due to the permanent phishing attacks the usage of online banking is declining. Some banks consider now to stop online banking completly and switch to digitally signed PDF forms.

PDF forms would look exactly like the old paper forms and thus would increase customer acceptance. The customer could fill and digitally sign those forms offline with Aloaha and email it to the Bank. The Banks server validates the digital signature, reads the data and commits the transaction to the database.

## Saver OCX

The Aloaha PDF Saver OCX is the ActiveX Version of the PDF Saver. It is included in the PDF Saver package to allow the user to integrate Aloaha into the companies inhouse applications.

Usage of the PDF Saver OCX is extremely easy. Just reference it ([aloaha.edit](http://aloaha.edit)) from your development workbench and draw it on your application dialog.

## Saver SDK

The PDF Saver SDK provides applications with easy APIs to the form fields of a PDF document. Fields can be accessed by Name, ID or Title to read, set or change the data.

This is the ideal solution for web based applications to prefill PDF forms with customer data such as address, personal details, etc or to connect the PDF form data to the application database.

It is also possible to import/export the form data as one Adobe compatible XML file.

## Form cannot be saved when opened in Adobe Reader

Adobe Reader - [doc\_order\_form.pdf]
