Introduction

Are you tired of sending files to clients, partners, suppliers, solicitors and consultants and finding that the look and feel of your document has changed or worse still, the document could not even be read at all?

Do you have similar problems when files are sent to you?

Could the effectiveness and efficiency of your team be improved by knowing that every time you send or receive a document, it can always be viewed exactly as it was created?

Do you have hundreds or maybe thousands of newsletters, manuals, technical papers and product specifications that you need published on the internet, intranets or on CD?

These common problems are why many companies have already defined PDF (Portable Document Format) as their company-wide publishing standard. Over 200 million users worldwide can now read PDF format documents.

Benefits of PDF

- Documents always look exactly the same, for all senders and receivers of a document, regardless of the hardware or software used.
- The documents act as color, electronic fax machines but with much higher quality and speed.
- Documents can be distributed worldwide for almost zero cost and then be digitally printed in small or large volumes, at any location.
- The documents can be magnified by up to 1600%, with no diminishing of quality.
- The documents can be navigated by keyword search, table of contents or hyperlinks. This greatly increases their usability.
- The format is ideal for presentations, since PDF documents always look exactly the same on all platforms.
- The file format is very compact, so files can be sent quickly to recipients.
- The file format is ideal for archiving, since the look and feel of documents is retained and the document size is compact.
- The file format is essential for business documents. Agreements and forms must retain their exact appearance and must be digitally signed for legal reasons. For example, this may apply to application forms, tax returns, license agreements, tender documents and invoices.

Aloaha Features

- Aloaha provides a simple and intuitive means of creating high-quality, vector based PDF files from any application.
- Business documents such as legal contracts or business proposals are often confidential. Aloaha PDF Creator provides capabilities to limit certain features, such as viewing, printing and editing by applying 40 or 128 Bit encryption.
- SMTP, WebDAV and MAPI Mail included.
- PDF Editor for manual tasks included.
- Digital Signatures are PDF-Signature Interchange Standard compatible.
- Smart Cards are supported.
- Letterheads can be rendered fully automatically to the PDF.
- Automatic Bookmark generation.
- JPG and JPG2000 compression.
- PDF Optimization.
- Embedded Commands.
- Automation compatible COM APIs.
- Terminal Services and Citrix compatible.

Aloaha PDF Editor

Aloaha includes its own PDF Editor. Features are:

- Sticky Notes.
- URL Hot Spots.
- Text Stamps.
- Bookmarks / Outlines.
- Image Stamps.
- Attachments.
- Digital Signatures. Multiple signatures supported.
- Change Media format of Documents.
- Page Imposing, deletion, extraction and re-ordering.
- Create booklets (N-UP, reduce pages).
- Edit PDF properties such as Author, Subject, Title and Keywords.
- Digital Rights Management (DRM).
- Decrypt encrypted PDF files without knowing the owner password!
- Image 2 PDF Conversion. Open any image document as PDF.
- JPG and JPG2000 compression.

Typical Workflow

1

Print the document to the Aloaha monitored printer to produce the PDF. For example invoice.

2

Apply your company letterhead to the PDF document.

3

Digitally sign the document with your digital signature to make it tax and/or legally compliant.

4

Automatically deliver document by email and/FAX. Addresses are read from the document itself.

Screenshots

The image displays three screenshots of the Aloaha PDF Suite software interface:

- TSA Configuration:** A dialog box for configuring Time Stamping Authority (TSA) settings. It includes a URL field set to `https://pki.aloaha.com/tsa.asp`, a checked **Enable Timestamping** option, a **Download TSA List** button, and a **Credentials** section with fields for **Username** (aloaha\AloahaPublic3466), **Password** (masked), and **Certificate**. Buttons for **Test**, **OK**, and **Cancel** are at the bottom.
- Settings 2.3.11:** A settings dialog box with a menu bar (PDF, Save, e-Mail, Print Settings, Digital Signature, Signature Settings, Bookmarks). The **Digital Signature** tab is active, showing a **Current User Store (default)** dropdown, a certificate selection dropdown (3) PRIMO ACTALIS, Actalis Qualified Certificates CA, 04.05.2008 11:52:30, and a text field containing `I am the author of this document`. A **digital sign PDF** checkbox is checked, and **Ok** and **Cancel** buttons are present.
- PDF Viewer:** A screenshot of a PDF document viewer showing a document page with the Aloaha Software logo and a sidebar with actions: **Show PDF**, **Print PDF**, **Save PDF**, **Mail PDF**, **Letterhead** (with a dropdown and **Apply to first page only** checkbox), **Options ...**, and **Close** (with **automatisch schließen** checkbox).

Top Benefits

FASTER, BETTER, CHEAPER – legally compliant!

All these features translate into faster, cheaper and less complex viewing, navigating, storing and printing of business documents. Digital document workflow throughout the company becomes more reliable and law compliant with richly formatted PDF and digitally signed documents. They maintain their very high quality, regardless of where they are sent or who views the documents. PDF is truly a global, document exchange format and brings you closer to a paperless office!

By using PDF documents within your own company and encouraging the usage of PDF software with your partners, suppliers, legal firms, accountants and various outside consultancies, then more and more of your business documents can be exchanged digitally. The benefits to the business are faster delivery, better customer service and lower costs.

Aloaha PDF Suite Editions

- **Light Edition**

This version is the ideal package for companies which require PDF Production on every desktop without the need of digital signatures.

- **Professional Edition**

Aloaha Smart Card Connector Technology is included in this edition to allow the user to digitally sign any PDF document automatically or manual via Aloaha PDF Editor.

- **Server Version**

A couple of hot folders such as tosign, autoprint, img2pdf and splitter are introduced here. The user can automate all tasks to create a fully automatic workflow

- **Enterprise Version**

Allows access to all Aloaha APIs such as the signature API.
