2005 4th Annual People's Choice Awards

for Exchange, SharePoint, Security & .NET

The Fourth Annual People's Choice Awards recognizes the best products and companies in our industry. Awards offered by other media companies that are supposed to honor the best products in our industry are often said to be awarded to the biggest advertisers. For the MSD2D awards, we feel that the only relevant vote is from the actual users. This makes the People's Choice award a far more coveted trophy. MSD2D will announce awards in each SharePoint, Exchange and .NET category at Tech-Ed 2005.
